

Eric Shaker

Durham, NC | +1 848-213-5000 | eric.shaker@duke.edu

EDUCATION

Duke University School of Medicine

Doctor of Medicine

GPA: N/A (Pass/Fail coursework)

Research: Focus ultrasound functional neurosurgery, AR/VR in spine surgery, radiosurgery for brain tumors

Durham, NC

Expected May 2028

University of Pittsburgh

Bachelor of Engineering

Major in Bioengineering; Minor in Chemistry

Cumulative GPA: 3.84/4.0; Summa Cum Laude, Dean's List 2019-2023

Coursework: Tissue Engineering, Synthetic Biology; AI in Healthcare; Multi-Modal Medical Image Analysis

Pittsburgh, PA

May 2023

WORK EXPERIENCE

PFIZER

New York, NY

Clinical Trial Statistics and Pharmacodynamics

June 2022 – Sep 2024

- Developed interactive software that allowed the team to observe the effects of varying different statistical parameters, including tunable models like negative binomial, beta binomial, and quasi-poisson
- Created linear mixed effects model to analyze effects of chemotherapies on physical activity metrics using Pfire Lab wearable device data
- Revised clinical trials documents prior to submission and engaged with FDA to ameliorate issues
- Engaged in structured coaching and leadership program with weekly 1:1 meetings with career coach

RESEARCH

NMRRG LAB

Aug 2024 - Present

- Conducted analysis on the first 200 patients receiving low intensity pulsed ultrasound for tremor therapy at Duke
- Developed a [clinical decision making tool](#) trained on a multi-institutional cohort of over 1,000 patients to evaluate likelihood to benefit from surgical resection versus radiotherapy for brain metastases
- Worked alongside industry to validate novel tablet enabled tremor characterization for clinic

DR. RUI LIANG LAB

Nov 2019 - Jun 2024

- Won the Michael G. Wells competition for innovation in healthcare for \$10,000 for device developed during research. Filed provisional patent as lead inventor. Presented at AUGS
- Investigated link between delayed wound healing, prolonged inflammation, and vascularization in polypropylene meshes due to alterations in macrophages and recent FDA recalls
- Carried out lab experiments, collected data, analyzed data using Nanostring software and developed R code to confirm results

COMMUNITY SERVICE

ROOT CAUSES

Durham, NC

Board Member of Lifestyle Medicine Interest Group

Aug 2024 – Present

- Working as part of LMIG to develop adaptive tools to help patients with disabilities to prepare food. Run healthy and sustainable cooking courses for students

MARLBORO VOLUNTEER EMS SQUAD

Marlboro, NJ

Member

Aug 2016 – Aug 2024

- Former Sergeant of the Cadet Corps. Responsible for new member education, disciplinary actions, and increasing size of cadet corps by 300% while being on call for >1000 hours and delivering highest quality patient care

ADDITIONAL

Technical Skills: R, Python, MATLAB, Deep Learning in Sci-kit, Machining, Arduino, Solidworks, FDA Regulation

Awards: Wells Healthcare Entrepreneurship Winner \$10,000, Roger and Christine LeMatty Scholarship

Hobbies: Judo, soccer, guitar, reading books and writing book reviews
